Lumina **Authoring and Publishing System**

A unique configurable production workflow management system for books, loose-leaf publications, and newsletters with a built-in authoring tool and a robust project management and tracking system.

To enhance publishing efficiencies, technology and automation have to work hand-in-hand to deliver a highly dynamic publishing workflow.

Whether bound books, loose-leaf publications, or newsletters, publishing workflows have complex processes, which include adhering to guidelines prescribed by publishers, working closely with authors to finalize the content, and driving the entire production process to ensure final content delivery across print and digital platforms.

The Lumina Authoring and Publishing System can help.

Features

- A configurable BPM framework for workflow customization
- Ability to handle books, loose-leaf publications, and newsletters/magazines workflows
- System-driven email notifications on the completion of each stage
