

How a Global Publisher Achieved 95,000 Pages of Error-Free Content

About the Client

The client is a renowned global legal publisher operating in the UK, US, India, and Hong Kong.

Challenges

The client faced a significant challenge in ensuring their legal publications were error-free, consistent, and aligned with changing legislative requirements. These issues impacted the quality and accuracy of the content, requiring comprehensive proofreading.

Executive Summary

The client faced challenges with inconsistent writing styles, syntax errors, and outdated legislative references. These issues impacted the quality and accuracy of their legal publications. Lumina Datamatics implemented a dual-layer proofreading approach ensuring 95,000 pages of error-free, consistent, and up-to-date content annually. This resulted in enhanced content quality, faster turnarounds, and reduced costs.

Special Issues Identified

- Inconsistent writing styles leading to a lack of uniformity in the documents
- Syntax errors that affected readability and professional presentation
- Difficulty in updating quoted legislation to reflect the changes
- Introduction of new errors related to punctuation and spacing during the revision stage
- Double or missing words affect clarity and text flow

Objective

Ensure error-free, consistent legal publications aligned with current legislative requirements, reducing turnaround times and costs.

Solution

Lumina Datamatics implemented a robust two-level proofreading approach supported by advanced tools and legal expertise.

- **Dual-Layer Proofreading:**
 - Level 1: Ensured content completeness.
 - Level 2: Focused on grammar, syntax, and legal updates.
- **Advanced Tools and Techniques:**
 - Adobe Reader for streamlined commenting and quick edits.
- **Comprehensive Legal Proofreading:**
 - Specialized in tables, front matter, and legislative references.

Results

- Delivered 95,000 pages of high-quality, accurate legal publications annually
- Achieved uniformity in writing style and formatting
- Ensured timely updates to legislative references
- Reduced turnaround time with streamlined workflows
- Minimized delays and reduced costs for clients

The Lumina Datamatics Difference

Lumina Datamatics revolutionized the client's content quality through its innovative dual-layer proofreading approach and advanced tools. By ensuring consistent writing styles, timely legislative updates, and reducing errors, the client achieved 95,000 pages of error-free legal publications annually.

This case study showcases the significant improvements in content quality, operational efficiency, and cost savings achieved through Lumina Datamatics' solutions.
